What is MyCC

Malaysian Common Criteria Evaluation and Certification **(MyCC)** Scheme is a systematic process for evaluating and certifying the security functionality of ICT products against defined criteria or standards.

MyCC Scheme evaluates and certifies the security functionality within ICT products against ISO/IEC 15408 standard which is known as Common Criteria **(CC)**. The methodology use in the evaluation is also an Internationally recognised standard known as Common Evaluation Methodology **(CEM)** or ISO/IEC 18045.

Under the Common Criteria Recognition Arrangement **(CCRA)** requirement, a scheme must be managed by a Certification Body **(CB)**. The Certification Body for the MyCC Scheme is the Malaysian Common Criteria Certification Body **(MyCB)**, a unit within the Information Security Certification Body **(ISCB)** Department of CyberSecurity Malaysia. MyCB is responsible for carrying out the certification and overseeing the day-to-day management and operation of the scheme.

when you choose an e-Filing Interface to electronically submit your clients returns to the LHDN, you require the assurance that the security functions of the product are functioning as claimed by the developer. **EA-Link System Sdn Bhd** has gone to extraordinary lengths to provide you with this assurance by submitting our software to an independent evaluation facility for certification under the international ISO standards.

SOME OF THE OTHER UNIQUE FEATURES

BATCH LOADING

AUDITED PROCESS MANAGEMENT

INTEGRATION WITH MS-EXCEL

BT-Direct allows you to load single or multiple forms at a push of a button.

BT-Direct allows authorised users to load Assessment information into the TAeF, or Taxpayer account without the need to know the e-Filing password.

BT-Direct automatically downloads the relevant PDF documentation from the LHDN e-Filing at the end of each load.

BT-Direct provides a controlled process that audits each step of the filing process.

BT-Direct lets you know everything about each filing including:

- Who did the filing
- When it was done
- For which client
- What step of the filing was done

BT-Direct provides integration with either *BRASSTAX*® or Excel template.

BT-Direct performs all input validation during the import to ensure the data can be loaded correctly into the LHDN e-Filing.
