BRASSTAX™
 Tax is easy when you have the right tools!

Under the Self-Assessment System, Taxpayers are required to understand and be familiar with the tax compliance and rules. It is the primary responsibility of the Taxpayer to accurately report their tax position and to maintain the relevant documentation as evidence to support their claims

Among the major challenges facing corporate Taxpayers today are:

- Ensuring that Staff have knowledge of the most recent changes relating to Tax Compliance.
- Ensuring that the Company maintains traceability and adequate documentation to support the basis of the Tax Computation.
- Providing accurate and timely reporting of the Company's future Tax liability for statutory filing and internal planning.
- Accurately tracking and managing tax adjustments relating to provisional accounts.

BRASSTAX® addresses these issues by providing an innovative end to end solution that allows companies to take charge of their Tax by incorporating the most recent Tax changes, and latest Technology and best Practices. Staff can now provide the company with up to date and accurate information about the present and future tax liability in a quick and timely manner.

The following diagram shows how the compliance modules are integrated to provide maximum traceability and accuracy of the Tax Liability of the company.
